

Off to new shores: VALVE WORLD EXPO Calgary also in Canada from 2026

Premiere at the TELUS Convention Center in Calgary (Alberta): for the first time now international players in the industrial valve sector will also be able to present themselves on the Canadian market on 3/4 June 2026. The new international satellite of the growing VALVE WORLD EXPO portfolio of MDNA, the US subsidiary of Messe Düsseldorf, will be organised jointly with proven cooperation partner KCI.

Innovative technologies, equipment and solutions that sustainably support the industries' transformation process towards energy efficiency and resource savings will be on show at the TELUS Convention Center over two trade fair days. Canada has large crude oil and gas deposits and is among the principal exporters of these fossil energy carriers worldwide.

“Expanding the product family of industrial fittings and valves to Canada enables our exhibitors to gain a foothold in the Canadian market and build attractive new business relations,” rejoices Friedrich-Georg Kehler, Global Portfolio Director at Messe Düsseldorf.

In addition to the leading trade fair in Düsseldorf there are international satellites in China, Southeast Asia, India and the USA. The new Canadian trade fair focuses on manufacturers and users of industrial valves as well as on companies from the maintenance segment dedicated to the sustainable maintenance of existing assets.
